

Science Under Sail Scholarship Application

BaySail is a private, nonprofit organization located in Bay City, Michigan. We offer unforgettable environmental education experiences aboard the tall ships *Appledore IV* & *Appledore V*.

Place-based education has been at the heart of our organization since 1998 and we're excited to welcome even more classrooms aboard with the help of scholarship funding provided by the Dow Chemical Company.

A limited number of partial scholarships have been made available for 2017/2018 Science Under Sail programs. Programs are offered from May through mid-October. Partial scholarship funding means that 50% (up to \$425) of the program cost may be covered with scholarship funding. Schools will be responsible for the remaining balance plus any additional costs such as transportation.

Please complete the following scholarship application and return to BaySail. Scholarship awards are made on a continual basis as funding allows. All applications will be reviewed by BaySail's education committee. Scholarship awards will be based on the following criteria:

- Teacher's commitment to implement pre- and post-trip activities in the classroom including BaySail's program evaluations
- History of previous scholarship funding from BaySail

Teacher Name/Applicant: _____

School: _____

Mailing Address: _____

Phone: _____ Fax: _____

Email: _____

Grade: _____ # of Students: _____ Type of School: Public Private

How many students attend your school? _____

What percentage of these students qualify for free or reduced lunch? _____

What subject(s) do you teach and for what grade levels? _____

Are you the primary science teacher for your students? _____

Have you or any of your classes attended an educational program aboard *Appledore IV* or any other schoolship? If so, which one(s)? _____

We always like to share creative ways of fundraising for a Science Under Sail program. What other fundraising will/has your class done to raise the necessary funds for this program?

How does your current science curriculum incorporate the ecology of the local waterways?

What expectations do you have for your students as a result of their *Appledore* experience?

Would you be interested in pre/post lessons taught in the classroom by a BaySail educator as an extension of your experience? Yes No
